

# Emmetropia

## Why Emmetropia?

Emmetropia respects the history and tradition of Crete in Laser surgery. Is a purpose-built international refractive surgery center, with state of the art equipment and medical personnel. It is the only center in Greece and one of the few in Europe to possess an 8th generation laser, the Schwind Amaris 750. **This equipment aims to maximize patient satisfaction by accurate surgical planning and optimal postoperative outcomes.**

Emmetropia as a pioneer in the ophthalmologic field, invests continuously in modern technology in order **to provide its patients the best and safer solution to their problem.**

The Emmetropia Mediterranean Eye Clinic has the ISO 9001:2000 certification, a proof of constant effort and determination in providing international-standard services, in order to assure patients that they are receiving **the highest quality of services at all times.**

## The Emmetropia Mediterranean Eye Clinic

Is a private ophthalmic surgery clinic, offers advanced vision correction in a patient-centered environment. Access to conventional and cutting-edge refractive surgery technologies for a wide range of vision problems enable our physicians to optimize results by meeting each patient's individual needs.

It offers procedures to correct vision problems such as myopia (nearsightedness), hyperopia (farsightedness), regular and irregular astigmatism, presbyopia, cataract, glaucoma etc.

Our doctors have access to advanced clinical pre-assessment facilities and specialize in a broad range of refractive techniques including:

- **wavefront assisted/topography** assisted LASIK, custom LASEK/PRK, intracorneal ring implants (INTACS)
- **astigmatic keratotomy (AK)**
- **refractive lens exchange, phakic intraocular lens implantation**
- **accommodative intraocular lens implantation.**

## goal vision

## Our Vision and our Goal

- To offer to as many patients as possible the gift of Emmetropia which means **Perfect Vision**
- To be a **point of reference worldwide** for our contribution in the field of ophthalmology
- To **follow up continuously the developments** in the field of ophthalmology and be involved in their shaping through our research department
- To employ the most **productive and cooperative team of scientists**
- To have the most pleased and satisfied patients through **friendly reception and the services we provide**

Emmetropia was founded in April 2005 as a fore type Ophthalmologic and Refractive clinic with aim to provide diagnosis and rehabilitation of vision problems by using modern technology and state of the art equipment not only to Greeks but also to foreign patients.

**Dr IM Aslanides** founder and medical director of Emmetropia SA finished his residency in London in 1992. From 1992 to 1996 he completed his PhD thesis at Weil- Cornell Medical College New York, USA on "Very high frequency Ultrasound in Refractive Surgery". Further to his refractive training IM Aslanides acquired a robust clinical training in other fields of Ophthalmology in USA.

- **1995-1996** subspecializes in "Neuro-Ophthalmology" at the SUNY (State University New York).
- **1996-1997** subspecializes in "Glaucoma" at the renowned Wills Eye Hospital, Thomas Jefferson University, Philadelphia, USA.
- **1997-1999** subspecializes in "Diseases of Retina and Macula" at the University of Toronto, Canada.
- **1999-2000** Holder of Onassis Foundation Grant, subspecializes in "Refractive Surgery of Anterior Segment of the Eye" at the university of Newcastle, in Great Britain.
- **2001-2004** Returns back to Greece as Medical Director of Refractive Surgery at the Vardinoyanio Eye Institute, Medical College University of Crete.

**IM Aslanides** has active participation in over 300 publications, abstracts, presentations, or book chapters at international level. Has performed over 8000 refractive and other eye surgical cases and has trained a large number of refractive surgeons from all over the world.

**IM Aslanides** is Clinical Assistant in Ophthalmology at Weil Cornell Medical College New York, USA, and acts as a scientific consultant in laser technology industry and in imaging systems in Ophthalmology.

## Our commitment to you:

- Make your safety our priority
- Provide advice and solutions to your problem based solely on your individual needs
- Provide services with the highest quality standards

### Procedures available:

- **Refractive procedures With Excimer Laser (Lasik, PRK, LASEK)**
  - With Clear Lens Extraction and IOL
  - With Bioptics which combines both the above procedures
- **Cornea Surgery- Cross-linking**
  - INTACS
  - Astigmatic Keratectomy
  - Corneal transplant
- **Presbyopia correction**
- **Phototherapeutic Keratotomy (PTK)**
- **Cataract surgery**
- **Laser surgery for**
  - Macular problems
  - Glaucoma
  - Ocular Hypertension, Diabetic retinopathy
